PUBLIC NOTICE REMINDER
RE: PRESCHOOL CHILD FIND CLINIC
“Reaching Families with Preschoolers with Special Needs”

In order to plan for the educational needs of preschool children with disabilities and special needs residing in our school district, they must first be identified. We have established a District Wide Child Find Clinic to help identify these children.

The classifications presently being served within the public school setting for preschoolers are: mentally disabled, hearing impaired, visually impaired, orthopedically disabled, speech and language impaired, emotionally disabled, autistic, traumatic brain injury, developmentally delayed and other health impaired. Clinics are from 8:30 to 11:00 a.m. one morning per month during the school year.

Interested parents should call the Special Services Office located at 1325C Boone Hill Road to register for the clinic’s vision, hearing, speech/language and developmental screenings. A short parent interview may be appropriate.

Also, if available, please bring with you copies of medical and developmental records prepared by physicians or other agencies to aid our Preschool Assistance Team in making recommendations for your child. For further information call 875-4161.

NOTE TO AGENCIES: Please post this notice/reminder with other community bulletins displayed in your building for public viewing. Thank you for assisting us in making this information readily available to concerned parents.
